

After the first two days of the Global Green Challenge from Darwin to Adelaide, Brendo today heads to Alice Springs.

Day 1 of the event saw Brendo and Geoff travel 337 kilometres from Darwin to Katherine, with fuel economy of 5.7 litres per 100km. Day 2 took them from Katherine to Tennant Creek, using 4.9 litres per 100 km.

Today's journey will see crews in the Eco Challenge part of the event head to their overnight stop in Alice Springs. After three days travelling in hot and humid conditions with no air-conditioning, Brendo says he is looking forward to the pool party tonight!
