

"This is only our second event in the car after our third place at Targa Wrest Point. Since then we've changed a couple of things to try and make the car suit me a little bit more. We've made it a bit softer in the suspension and changed the way the seat is situated in the car, and a few different things."

"Today we didn't have a great run - we caught a slower car on the first stage and couldn't get around them, but that stage was only point and squirt for us, so I kept the boost down to preserve the tyres because it's a rear wheel drive and it's a long event to go."
